Removable bollard for urban furniture h521_03

Cylindrical steel bollard with stainless steel band, diameter 100mm and height 1000mm. Removable system with lock for flexible

gate management.

This parking bollard represents an **urban furniture** solution that combines a minimal and refined design with high functional performance. Designed for the delimitation of avenues, public parks, and prestigious entrances such as villas or pedestrian areas, the device acts as a physical and aesthetic barrier for vehicular traffic control. The main **steel** structure guarantees solidity, while the upper **stainless steel** insert increases its resistance to atmospheric agents in the points of greatest exposure.

Technical features

- **Body material:** steel with protective finish
- **Upper band material:** corrosion-resistant stainless steel
- **Geometry:** circular cylindrical shape
- **Diameter:** 100 mm
- **Height above ground:** 1000 mm
- **Fixing system:** built-in base
- **Mechanism:** removable via security key lock
