

Removable cast iron bollard for public spaces h744_41

Removable bollard in EN GJL 200 cast iron, height 60 cm. Column design with octagonal base, ideal for the flexible delimitation of urban areas.

The **bollard H744_41** represents an advanced technical solution for the modular management of public and private spaces. Made of **cast iron EN GJL 200**, complying with the **UNI EN 1561** standard, this urban furniture element is designed to effectively resist impacts and the degrading action of atmospheric agents, ensuring a prolonged service life in outdoor contexts.

The structure stands out for its column design with an **octagonal base** and ornamental grooves, culminating in a **spherical capital** that provides a refined aesthetic, suitable for both historic centers and modern architectural complexes. The added value of this model lies in its **removable nature**: thanks to an internal plug-in core and a **hot-dip galvanized iron sleeve** to be buried, the bollard can be removed quickly to allow the passage of emergency vehicles, loading/unloading operations or for the management of temporary events.

Technical features

- **Material:** EN GJL 200 cast iron (UNI EN 1561)
- **Shape:** Octagonal column profile with upper spherical capital
- **Aesthetic details:** Ornamental grooves in the lower section of the base
- **Fixing system:** Removable with internal plug-in core
- **Ground component:** Hot-dip galvanized iron sleeve included
- **Installation depth:** 14 cm at ground level "0" for housing the sleeve
- **Height above ground:** 60 cm
- **Upper diameter:** 12 cm
- **Base width:** 14 cm
- **Intended use:** Delimitation of pedestrian areas, ZTL gateways, reserved parking lots
