

Removable cover vacuum mattress h687_80

Compact vacuum mattress in PVC and removable nylon (2060x800 mm). Equipped with 8 integrated handles and brass valve for immobilization.

The **compact vacuum mattress** is a device designed for the safe immobilization and transport of the patient in emergency scenarios. The structure features a **PVC inner part** and a **removable yellow nylon outer cover**, designed to facilitate sanitization operations and ensure maximum hygiene. The transport system is entrusted to **8 handles integrated** into the outer part, which offer an ergonomic and safe grip for operators. Vacuum management occurs via a **chromed brass on/off valve**, complete with a built-in fitting for connection to rubber tubes.

Technical features

- **Length:** 2060 ± 20 mm
- **Depth:** 800 ± 10 mm
- **Number of handles:** 8 transport handles
- **Materials:** PVC, nylon, polystyrene
- **Inner part material:** PVC
- **Outer cover material:** Nylon (removable and washable)
- **Color:** High-visibility yellow
- **Weight:** 7.8 ± 0.5 kg
- **Load capacity:** 150 kg
- **Valve:** Chromed brass on/off system with fitting for rubber tubes
- **Regulatory compliance:** Class I Medical Device compliant with EU Reg. 2017/745
- **CND Classification:** V0804
