

Rescue bag for oxygen cylinder h690_07

Emergency bag for oxygen cylinder transport. Color: red. Material: polyester.

Emergency bag specifically for the transport of **oxygen cylinders up to 3 liters**. Characterized by a **compact size** which makes it **easy to handle** and by its **ergonomic design**. Thanks to the **adjustable straps**, it can be carried both as a bag and as a backpack. Equipped with a **transparent side window** to monitor the level of oxygen available. The interior, besides being completely padded to best protect the contents, features removable and adjustable straps to keep the oxygen cylinder well anchored and steady.

Technical features:

- Dimensions: W46 x D15 x H20 cm
- Material: polyester
- Color: red
- For oxygen cylinders up to 3 l
- Adjustable straps for transport with handle or shoulder strap, also adaptable as backpack straps
- Reflective top handle to facilitate movement and position it vertically
- Day/night reflective tape surrounding the entire bag
- Transparent window allowing the control of the oxygen flow at any time
- Front MOLLE system allowing the anchoring of other bags and accessory compartments
- Metal outlet washer for the oxygen tube
- Reinforced bottom base with non-slip and waterproof material
- Interiors fully padded with high-density EVA which guarantees total protection of the contents
- High-resistance reflective handles
- Removable and adjustable internal straps on the perimeter of the cylinder that ensure its perfect anchoring
- Two internal mesh pockets with zipper to hold additional material and instruments
