

## Rescue spinal board h711\_08

Spinal board for patient transport. Dimensions: L.185 x D.42.5 x h.5 cm. Capacity: 150 kg.

**Spinal stretcher for emergency operations**, specifically for transporting patients with spinal injuries. Its particular **rigid structure** allows the patient to maintain a proper position to avoid possible back injuries. Made of **durable yellow plastic**, waterproof and suitable for X-ray examinations. Particularly **lightweight and easy to transport** thanks to the **handles located along the perimeter**. Equipped with special **safety belts** with quick release for patient immobilization.

### Technical features:

- Dimensions: L.185 x D.42.5 x h.5 cm
- Capacity: 150 kg
- Material: plastic
- Color: yellow
- Weight: 6 kg
- Waterproof
- Suitable for X-rays
- Handles along the perimeter
- 3 safety belts with quick release
- Compliant with DIN 1865 standard
