

## Restaurant kitchen waste bin h462\_29

100-liter stainless steel wheeled bin with pedal opening, ideal for hygiene and mobility in professional kitchens and laboratories. The **professional stainless steel bin** of 100 liters represents the ideal solution for waste management in high-intensity operational environments. Designed to meet the rigorous hygiene standards of industrial kitchens and food laboratories, it combines structural robustness and practicality of use thanks to the integrated movement system. The wheeled base with **swivel wheels** facilitates dynamic positioning, while the pedal command ensures waste disposal without any manual contact with the container, effectively preventing cross-contamination.

## Technical characteristics

- Dimensions: Ø45 x H72 cm
- Volumetric capacity: 100 liters
- Material: High-resistance stainless steel
- Opening system: Lid with reinforced pedal mechanism
- Portability: 2 swivel wheels and integrated maneuvering handle
- Design: Self-supporting cylindrical structure for easy sanitization
