

Retractable belt stanchion for airports h16230

Airport apron trolley equipped with 2 retractable belt reels of 22 meters each. Aluminum post and plastic base with 2 wheels. For outdoor use.

This boundary post designed for the airport apron consists of 2 retractable belt reels of 22 meters.

To ensure maximum stability, the aluminum structure consists of a heavy base equipped with two wheels and a handle to facilitate movement.

To ensure maximum visibility, the belts are available in neon yellow and are anti-static and weather-resistant.

Easy to use, the reel is equipped with an integrated centrifugal brake, allowing a single operator to delimit the area even alone.

Technical features:

- Belt length: 22 meters
- Belt width: 50 mm
- Post structure: aluminum
- Base structure: plastic
- Belt color: neon yellow
- Total weight: approx. 55 Kg
