

Road manhole cover class D400 h638_73

Square cast iron manhole cover. Dimensions: W.400x D.400.H.75mm

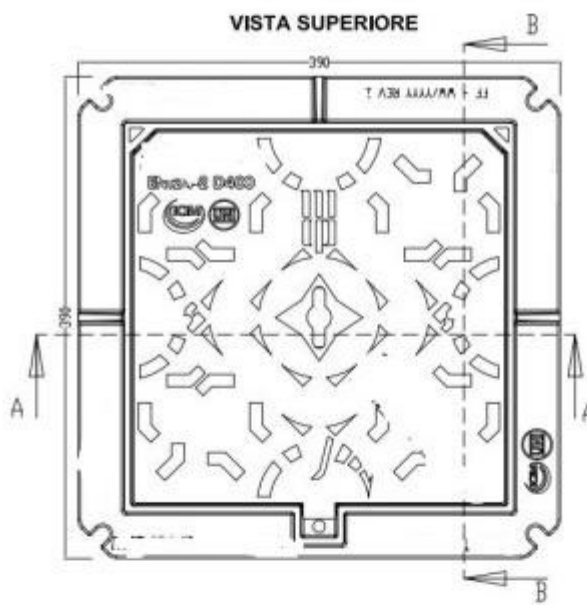

Road manhole cover in ductile iron, load class D400. Suitable for installation on roads where cars and trucks pass. Structured with a **square frame and cover**. Specifically, the frame is equipped with: an adequate **continuous external perimeter flange on all four sides**, appropriately shaped and rounded at the corners for a larger support base and better anchoring to the foundation; an **internal "U"-shaped seat** that offers odor tightness by filling with sand or other materials in coupling with the cover; a rounded corner for the insertion of the cover. The cover is provided with slots to allow the insertion of lifting keys and features **anti-slip reliefs** to allow water runoff.

Technical features:

- Material: ductile iron - GJS-500-7 – EN 1563
- Dimensions: 400 x 400 mm
- Height: 75 mm
- Square frame
- Square cover
- Net opening: 300 x 300 mm
- Total weight: 17 kg
- Load class: D400 – ISO 9001:2015 certified
- Airtight
- With automatic closure
