

Road manhole cover for telephony h638_15

Spheroidal graphite cast iron manhole cover for telephony. Dimensions: 78 x 135 cm.

The **road manhole cover for telephony h638_15** is a high-performance closure and inspection device, specifically engineered for underground telecommunication networks. Manufactured in **spheroidal graphite cast iron** in strict compliance with the UNI EN 1563 standard and classified in load class D400, this product is fully compliant with technical specification **S.T. TELECOM ITALIA No. 1480/2015**. The product solves the problem of security and stability of road covers subject to heavy traffic, thanks to a rectangular frame equipped with a **continuous external perimeter flange on all four sides**, provided with slots to ensure optimal anchoring to the concrete foundation. The target audience consists of excavation and cable laying companies, telecommunications sector companies, and public bodies that require safe and certified access to underground inspection chambers.

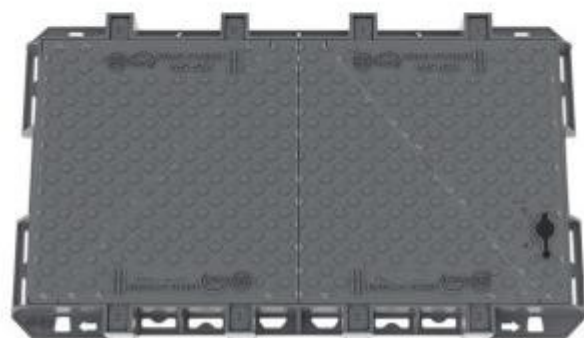

Technical features

- **External frame dimensions:** 135 (length) x 78 (depth) x 10 (height) cm
- **Clear internal opening:** 120 x 60 cm
- **Total weight:** 157 kg
- **Material:** Spheroidal graphite cast iron according to UNI EN 1563
- **Load class:** D400 (suitable for heavy and continuous road traffic)
- **Cover configuration:** 4 triangular-shaped elements with tripod support
- **Locking system:** Keyed lock on the first cover and sequential closing of the remaining modules
- **Mechanical safety:** Hinges with maximum opening at 110° and automatic safety lock at 90°
- **Anchoring:** Slotted perimeter flange on all 4 sides for foundation coupling
- **Technical compliance:** Approved according to S.T. TELECOM ITALIA No. 1480/2015
