

Roll-up physiotherapy mat h581_61

Physiotherapy mat in polymer foam, 180x70x1 cm, gray. Space-saving roll-up structure for rehabilitation and postural gymnastics.

The **physiotherapy mat** is a professional support designed to offer a stable and comfortable base during the execution of rehabilitation protocols, postural gymnastics exercises, and muscle strengthening activities. Its structure is designed to guarantee **ergonomic support** that protects the joints from direct contact with hard surfaces, improving the patient's compliance during therapy.

Thanks to the **roll-up** design, this mat is extremely practical for professionals who need to optimize space within physiotherapy studios or for those who require a solution that is easily transportable between different operating areas. The gray shade gives a sober and technical look, ideal for clinical and outpatient contexts.

Technical features
