

Roll-up projection screen h920_04

Projection screen with open rear housing, wall/ceiling mounting. Maximum dimensions: 1860 x 1268 mm.

The **roll-up screen** with open housing is designed for professional installations, such as in **schools, meeting rooms or corporate environments**. The design allows for simple and quick mounting, thanks to the assembly system on a roller with **rear drop**.

The **Vision White** fabric ensures excellent image quality, making this product ideal for high-precision presentations or projections. The **borderless finish** and the **wrinkle white** color of the end cap ensure a modern look, perfect for minimalist environments.

Technical characteristics:

- **Maximum dimensions:** 1,860 x 1,268 mm.
- **Fabric:** Vision White, borderless to maximize the projection area.
- **End cap finish:** Wrinkle white.
- **Transmitter:** single-channel and 3 buttons
- **Assembly:** On roller with rear drop.
- **Installation:** Wall or ceiling mounting.

User benefits:

- **Simple and versatile installation** thanks to the symmetrical system.
- **Quiet operation during use** for a distraction-free experience.
- **Sturdiness and durability** guaranteed by iron and aluminum materials.

FAQ:

- 1. Is it suitable for mobile installations?**
No, the design is specific for fixed wall or ceiling installations.
- 2. Are other sizes available?**
Yes, consult the catalog to check available options.

Buying guide:

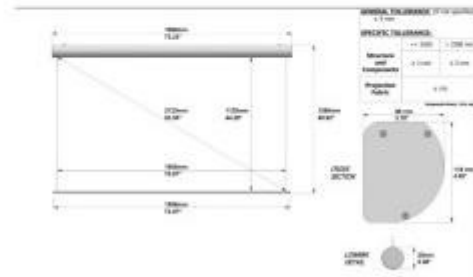

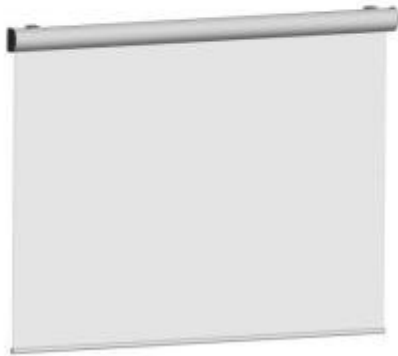

To choose the best roll-up screen, consider the available space and projection distance. This model is ideal for medium-sized environments with a standard or short-throw projector.
