

Rollable emergency stretcher h1046_05

Rollable emergency stretcher h1046_05 in black HDPE. Flexible medical device for confined environments and helicopter rescue. Weight: 7.3 kg.

The **rollable emergency stretcher h1046_05** is a rollable medical device specifically designed for rescue in confined environments, developed for **healthcare operators, helicopter rescue technicians, civil protection teams, and industrial safety personnel** who require a high-flexibility system. This device is particularly suitable for the evacuation of injured persons from cramped places with narrow or complicated passages, serving as an extremely flexible and useful tool for evacuating victims in complex environmental conditions. The system solves the operational problem of **extracting, lifting, and moving traumatized patients in small spaces or during aerial recovery operations, ensuring optimal protection against abrasion and immediate orientation of the victim**. The structure is entirely free of rigid frames, making it easy to store and transport in the provided bag equipped with shoulder straps and a side zipper. Made of black HDPE, the stretcher complies with the requirements set by EU Regulation 2017/745 for use in medical and professional fields.

Technical features

- **Product type:** rollable and flexible medical device for emergency rescue
- **Compliance and certification standards:** EU REGULATION 2017/745
- **Body construction material:** HDPE (High-Density Polyethylene)
- **Overall structural mass (Weight):** 7.3 kg
- **Device length:** 245 cm
- **Device width:** 92 cm
- **Color finish:** Black
- **Profile physical properties:** adequate thickness to resist abrasion, provide greater patient protection, and increased rigidity during handling
- **Frame configuration:** free of rigid frames
- **Vertical lifting systems:** slings for vertical transport in shafts or tunnels
- **Horizontal lifting systems:** sling for horizontal winching even from helicopters
- **Manual handling devices:** side handles for transport with multiple operators
- **Visual safety systems:** side handles equipped with high-visibility reflective indicators for rapid identification in dark areas
- **Patient positioning supports:** head/foot identification stickers that facilitate correct patient positioning
- **Combined use compatibility:** can be used alone or in combination with a spine board, a vacuum mattress, or positive pressure mattress

- **Maintenance and hygiene:** easy to clean and disinfect, simple maintenance thanks to separately replaceable components
- **Included containment accessories:** dedicated bag equipped with shoulder straps and side zipper for storage and transport
- **Technical survey document reference:** file named "image_572a63.png"
