

Room waste bin with compartments h957_41

Metal room waste bin with 4 removable compartments, black structure. Total capacity: 110 liters. Dimensions: Ø 46 x H 66.5 cm.

The **H957_41 hotel recycling bin** is a practical and professional solution for **sustainable waste management** within rooms, offices, and common areas. Designed for use in hospitality environments, it is made with high-quality materials that combine **functionality, aesthetics, and safety**.

The structure is made of **white cold-rolled sheet metal** (DC01 quality – EN10130 standard) with an electrostatic **fire-retardant polyester resin** coating, classified **A2-s1, d0** according to the EN 13501-1 standard and **M1** according to the UNE 23727 standard. This makes it **suitable for indoor use**, even in contexts subject to strict fire safety regulations.

The bin is equipped with **four removable internal buckets** of different colors (yellow, blue, brown, and green), which facilitate **waste sorting** and make emptying operations faster and more hygienic. Each bucket is easily accessible and can be removed individually.

The base is enhanced by a **black PVC decorative element** with a metal insert, which gives the product an elegant and modern look, perfect for **high-end hotel rooms**, tourist facilities, and professional spaces that pay attention to aesthetics as well as functionality.

With a **total capacity of 110 liters** and a **net weight of 15.8 kg**, the H957_41 bin is built to **withstand daily use**, maintaining its technical characteristics even in the event of impacts or abrasions. All components are subjected to rigorous **quality tests** regarding resistance, safety, and durability.

Organize waste sorting in your facility at its best with the **H957_41 bin**. Contact us to receive a personalized offer for bulk supplies.

Technical specifications:

- **Structure:** cold-rolled sheet metal (DC01 – EN10130)
- **Coating:** electrostatic fire-retardant polyester resin
- **Fire reaction class:** A2-s1, d0 (EN 13501-1) – M1 (UNE 23727)
- **Polymerization:** 200°C for 20 minutes

- **Coating thickness:** 60 microns
- **Total capacity:** 110 liters
- **Dimensions:** Ø 46 x H 66.5 cm
- **Net weight:** 15.8 kg
- **Structure color:** black
- **Internal buckets color:** yellow, blue, brown, green
- **Bottom decorative element:** PVC with metal insert
- **Internal buckets:** 4, individually removable
- **Intended use:** hotel rooms, offices, indoor environments

User benefits:

- **Waste sorting:** simple and intuitive thanks to the colored buckets.
- **Aesthetics:** modern and elegant finish for refined environments.
- **Safety:** guaranteed by certified fire-retardant materials.
- **Practical:** easy to empty thanks to the removable internal containers.
- **Construction:** robust and resistant to abrasions and impacts.

FAQ:

1. **Is the bin suitable for hotel room use?**
Yes, it was designed for discreet, functional use that complies with regulations even in hospitality environments.
2. **Are the internal containers individually removable?**
Yes, each bucket can be removed separately to facilitate collection and emptying.
3. **Is it fire-resistant?**
Yes, the product is certified fire-retardant according to European and Spanish regulations.
4. **Is assembly required?**
No, the product arrives already assembled and ready for use.
5. **How much does the complete bin weigh?**
The net weight is 15.8 kg, ensuring stability and robustness.

Mini buying guide:

When choosing a **recycling bin** for professional environments, it is important to evaluate **functionality, material durability**, and compliance with **fire safety regulations**.

A model like the H957_41, with **colored and removable internal buckets**, is ideal for simplifying correct waste disposal.

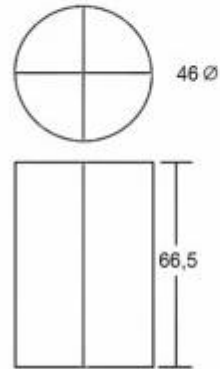

The powder-coated **metal structure** ensures durability and a sober aesthetic, perfect for elegant spaces like hotels, resorts, and offices. Finally, the certified **fire reaction class** makes it suitable even for environments regulated in terms of safety.
