

## Round ballot box h972\_96

15-liter round ballot box in transparent PMMA. Dimensions Ø 20x25 cm, 115x10 mm slot and key lock for secure voting.

The **round ballot box h972\_96** is a compact and professional solution designed for the secure collection of votes, suggestions, surveys, or small documents. Thanks to its vertical structure and **15-liter** capacity, this container solves the problem of clutter on desks, reception counters, or school desks, offering a neat and elegant aesthetic presentation.

Made entirely of **transparent PMMA**, the box guarantees maximum visibility of the content, making collection operations transparent and easily monitored. Security is guaranteed by a **key lock system** that protects documents from tampering or unauthorized access. Stability is further increased by the **non-slip foam base**, which also protects the most delicate support surfaces from scratches or impacts.
