

Round protective tree grate Ø 990 mm h330_50

Round tree protection grate, made of galvanized and painted steel with a corten finish and striped design. External diameter: 990 mm. Structure divided into 4 sectors with perimeter reinforcement.

The **h330_50 grate** is designed to provide protection and aesthetic definition to trees in public spaces, squares, sidewalks, and high-traffic urban contexts. Its **striped round design**, combined with the **corten finish**, gives the structure a modern and natural look, perfect for contemporary urban furniture.

Made of **galvanized and painted steel**, the grate is **laser-cut**, divided into **4 sectors** that are easy to assemble. The edge is equipped with a **perimeter reinforcement plate** that increases its strength and stability.

The supply is completed with **hot-dip galvanized steel screws** and **fixing brackets** for concrete surfaces or with anchors, ensuring a reliable and durable system.

Ideal for enhancing public spaces by protecting the roots and the base of trees with a touch of industrial style.

Choose the **h330_50 round grate** to protect urban greenery with a resistant structure and a refined design.

Technical characteristics:

- **Model:** round
- **Material:** galvanized and painted steel
- **Number of sectors:** 4
- **Perimeter reinforcement plate:** steel
- **Design:** striped
- **Finish:** corten
- **External diameter:** 990 mm
- **Fixing:** hot-dip galvanized screws and brackets

User benefits:

- **Effective protection:** protects the base of the tree from impact, trampling, and wear.
- **Durable materials:** steel structure treated to last over time.
- **Modern aesthetics:** circular striped design with decorative corten finish.
- **Modular structure:** composed of 4 easily manageable sectors.
- **Versatility of use:** suitable for public spaces and pedestrian areas.

FAQ:

1. **What is the diameter of the grate?**
The grate has an external diameter of 990 mm.
2. **What material is used?**
The grate is made of galvanized and painted steel, with a corten finish for greater resistance and aesthetic appeal.

3. **How is the structure composed?**

It is made of 4 sectors with a perimeter reinforcement plate that ensures solidity and compactness.

4. **Is it suitable for high pedestrian traffic areas?**

Yes, the grate is designed to integrate into urban paving and withstand daily trampling.

5. **Does the corten finish require maintenance?**

No, the corten-effect painting is weather-resistant and maintains its aesthetics over time.

Mini buying guide:

If you are looking for a protective grate that combines **functionality and design**, the **h330_50** is the right choice. Made of **resistant steel** and designed with **laser cutting** for a precise and modern round shape, this grate is perfect for protecting the base of trees without sacrificing style.

Its **striped design** and **corten finish** fit perfectly into contemporary urban contexts, while the **4-sector composition** facilitates management and installation. A practical and decorative solution for every **sustainable urban furniture** project.

Round corten tree grate, steel protection for urban plants, laser-cut grate 990 mm, striped tree grate, resistant urban furniture grate.
