

Round steel pedestrian barrier with advertising panel h14067

Galvanized steel pedestrian barrier, with removable advertising panel.

Galvanized steel pedestrian barrier, ideal for furnishing urban areas of the city with a removable advertising panel.

Structure:

- supporting uprights and upper arch in round galvanized steel tube;
- horizontal connection crossbars in round galvanized steel tube;
- n° 04 connection plates in galvanized sheet metal, arranged on the supporting uprights;
- advertising panel (removable) in galvanized sheet metal, 12 / 10 thickness.

Available alternatives:

1. supporting uprights and upper arch in round galvanized steel tube, Ø 60 x 2 mm; with horizontal connection crossbars in round galvanized steel tube, Ø 30 x 1.5 mm;
2. with external frame in round galvanized steel tube, Ø 40 x 1.5 mm, with connection crossbars and internal cross in round galvanized steel tube, Ø 25 x 1.5 mm

Finish:

- galvanized and oven-painted structure in epoxy powder, "gunmetal" color;
- spaces intended for advertising are not painted.

Fixing:

- by extending the supporting uprights into the ground.

Dimensions:

Useful advertising space:

- width 84 cm

- height 58 cm.

Barrier:

- height above ground 105 cm;
- total width 100 cm;
- part to be buried 20 cm;
- weight 18 kg.

INFORMATION

- **Length in millimetres** 1000.000000
- **Height in millimetres** 1050.000000
- **fixing** da interrare
