

Round stool with backrest for medical clinics h904_13

Medical stool with round seat and backrest. Aluminum base. W. 50 x D. 50 x h. from 47 to 59 cm.

The **medical stool** described is an essential element for any clinical environment, characterized by a **functional and comfortable design**. The **round-shaped seat** offers great flexibility of movement, facilitating quick and easy access to different work areas. The **seat padding**, made of **5 cm thick semi-hard foam**, ensures optimal comfort during long work sessions, adequately supporting the operator's posture. An **ergonomic backrest** accompanies the seat, providing additional lumbar support and helping to reduce fatigue. The stool is easily **height-adjustable**, with a range from **47 to 59 cm**, allowing it to adapt perfectly to the specific needs of the user and the work environment. The metal frame is sturdy and stable, with an **aluminum star base** that ensures durability and resistance over time, as well as uniform weight distribution. The possibility of choosing the **seat and backrest upholstery in different colors** offers a touch of customization, allowing the stool to be integrated into any aesthetic context. This medical stool represents the perfect synthesis of ergonomics, practicality, and design, effectively responding to the needs of healthcare professionals.
