

Round tree grate Ø 990 mm in corten steel h330_55

Protective tree grate in galvanized and painted steel, with corten finish and perimeter reinforcement plate. External diameter: 990 mm.

The **round tree grate h330_55** is a solid and elegant solution designed to protect tree bases in urban and pedestrian environments. Built in **galvanized and painted steel**, it is laser-cut, ensuring structural strength and long durability even in adverse weather conditions.

The **perimeter reinforcement plate** improves robustness and load distribution, while the **corten finish** gives a rustic and contemporary look, ideal for integrating harmoniously into urban contexts.

The mounting system is facilitated by **hot-dip galvanized steel screws** and **brackets**, which allow for secure fixing on concrete surfaces or via anchor bolts.

Optimal for those looking for a functional, resistant round grate with a refined aesthetic.

Protect and enhance wooded areas with the **round grate h330_55**, a robust choice with a timeless design.

Technical features:

- **Model:** round
- **Material:** galvanized and painted steel
- **Perimeter reinforcement plate:** yes
- **Finish:** corten
- **External diameter:** 990 mm
- **Fixing:** hot-dip galvanized steel screws and brackets for concrete or anchor bolts

User benefits:

- **Targeted protection:** safeguards the area at the base of trees.
- **Durable material:** steel suitable for intensive outdoor use.
- **Modern look:** corten finish that combines aesthetics and functionality.
- **Reinforced structure:** greater solidity thanks to the perimeter plate.
- **Minimal maintenance:** built to last over time.

FAQ:

1. **What are the dimensions of the grate?**
The grate has an external diameter of 990 mm.
2. **Is the product galvanized?**
Yes, the structure is in galvanized and painted steel, ideal for resisting atmospheric agents.

3. **What is the function of the perimeter plate?**

The reinforcement plate ensures greater stability and mechanical resistance.

4. **Is it possible to use the grate in high-traffic public spaces?**

Yes, it is designed for urban environments and withstands constant stress well.

5. **Is special maintenance required?**

No, thanks to the corten finish and galvanized steel structure, maintenance is kept to a minimum.

Mini buyer's guide:

The **round grate h330_55** is ideal for urban projects that require a perfect balance between **function and design**. Robust, resistant, and with a modern aesthetic, it protects tree bases, preventing damage caused by pedestrians or vehicles.

Thanks to the **corten finish** and **laser cutting**, it offers an elegant and discreet architectural touch. A solution designed to last over time, perfect for high-quality public spaces.

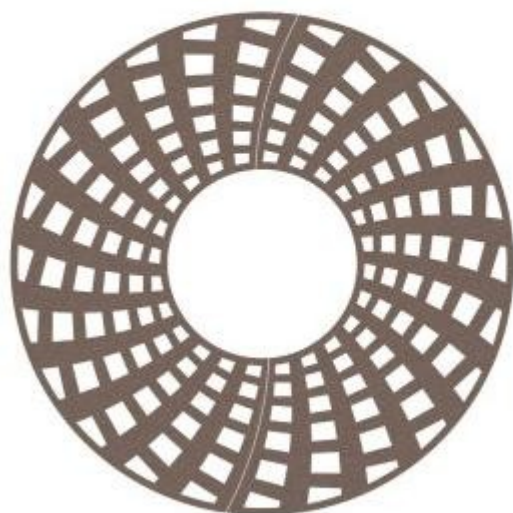

Round tree grate corten, tree base protection 990 mm, galvanized painted steel tree guard, urban plant grate, laser-cut grate for street furniture.
