

Round tree guard Ø 990 mm leaf pattern h330_52

Round tree guard in galvanized and painted steel with laser-cut leaf pattern and corten finish. Outer diameter: 990 mm. 4 sectors with reinforced perimeter edge.

The **tree guard h330_52** is an ideal solution for the **protection of tree bases** in high-traffic urban contexts. The **round design with leaf pattern**, obtained through **laser cutting**, provides an elegant and natural aesthetic, perfect for integrating into public environments or pavements with green elements.

Made of **galvanized and painted steel**, with a perimeter reinforcement plate to ensure stability. The product is divided into **4 sectors**, easily assembled, which allow for practical handling even during installation.

The **corten finish** recalls natural and rustic tones, harmonizing with the environment. The system includes **hot-dip galvanized steel hardware** and **fixing brackets** for concrete or using wall plugs.

Perfect for those looking for a robust and decorative product, capable of protecting and enhancing trees within well-kept urban spaces.

Protect your green spaces with elegance: choose the **h330_52 tree guard**, solid, functional, and with a natural design.

Technical features:

- **Model:** round tree guard
- **Material:** galvanized and painted steel
- **Number of sectors:** 4
- **Decorative pattern:** leaves
- **Perimeter reinforcement plate:** steel
- **Finish:** corten
- **Outer diameter:** 990 mm
- **Fixing:** hot-dip galvanized hardware and brackets for concrete or wall plugs

User benefits:

- **Optimal protection:** protects the base of the tree from trampling and impacts.
- **Durable materials:** treated steel to resist atmospheric agents and wear.
- **Elegant decoration:** the leaf pattern adds a distinctive aesthetic touch.
- **Modular structure:** the 4 sectors simplify handling and installation.
- **Application versatility:** suitable for various urban furniture configurations.

FAQ:

1. **What is the diameter of the tree guard?**
The outer diameter of the grate is 990 mm.

2. **What materials are used?**

The structure is in galvanized and painted steel, with a corten finish.

3. **Is the leaf decoration functional or just aesthetic?**

It is decorative but also allows water and air to pass through to the roots.

4. **Is it resistant to trampling?**

Yes, thanks to the thickness of the structure and the strength of the material.

5. **How does it integrate into public spaces?**

The round design and leaf pattern make it ideal for elegant and natural spaces, in harmony with the urban environment.

Mini buying guide:

The **tree guard h330_52** is the perfect choice for those who want a **decorative and functional** element for tree protection in urban areas. With its **round shape** and **leaf** pattern, laser-cut on high-quality steel, it combines structural strength and refined aesthetics.

Easy to manage thanks to its **4-sector composition**, the tree guard adapts to different types of paving, becoming a fundamental element for **well-designed urban furniture**.

Round corten tree guard, decorative steel tree grate, leaf pattern tree base protection, 990 mm tree guard, laser cut grate for urban furniture.
