

Saddle stool for medical practice h930_71

Saddle stool with adjustable footrest and wheels. Seat dimensions: 32 x 46 cm. Height: from 62 to 88 cm.

The **H930_71 saddle stool for medical practices** is an ergonomic and functional device designed to ensure **maximum comfort, hygiene, and freedom of movement** for doctors, healthcare professionals, and technical staff. It is ideal for high-activity professional environments such as **clinics, outpatient clinics, laboratories, beauty and dental centers**, where maintaining a correct posture during prolonged activities is essential.

The structure features a **5-star chromed base with wheels**, which ensures **stability and optimal mobility** during use. In addition, it is equipped with an **adjustable footrest**, particularly useful when the stool is used at higher settings, to **properly relieve the weight of the lower limbs** and improve the overall ergonomics of the posture.

The saddle seat, measuring **32 x 46 cm**, is made of **non-slip polyurethane**, a material **resistant to abrasion, easy to clean**, and compatible with the use of **detergents and disinfectants**, which is essential in healthcare environments.

The height is **adjustable from 62 to 88 cm** via a gas actuator, while a mechanism under the seat also allows for **tilt adjustment**, so it perfectly adapts to the user's physiognomy and position. With a **weight of 5.5 kg** and a **maximum capacity of 150 kg**, the stool offers an **ideal combination of solidity, lightness, and practicality**.

Buy the **H930_71 saddle stool with adjustable footrest** now: the perfect solution for improving comfort and efficiency in the medical practice!
