

Safety barrier for construction sites h28015

Safety barrier with central handle ideal for delimiting an area with an electrical system. Color: yellow. Available in two different sizes.

Protection barrier designed to delimit specific areas such as parking lots, manholes and construction sites. **Metal-free structure**, made of polypropylene with anti-UV treatment, suitable for use in places where there is an electrical risk. The construction site barrier is easy to move thanks to a **central handle** and **lightweight design**.

The **h28015 protection barrier** is available in the following sizes:

- 3-element model - Length 2520 x Height 1000 mm - Weight: 8 kg
- 4-element model - Length 3360 x Height 1000 mm - Weight: 11 kg

Technical features:

- Material: polypropylene
- Color: yellow
- Anti-UV treatment
- Use: indoor/outdoor
