

Safety harness and vest for working at heights h1053_03

Safety harness for working at heights integrated into a high-visibility yellow vest h1053_03. Quick-release closures and rear anchorage. Sizes S-XL.

The **safety harness and vest for working at heights h1053_03** is an integrated personal protective equipment developed specifically for professionals in the construction, logistics, and road maintenance sectors. This solution addresses the operational challenge of having to wear and coordinate two separate devices in contexts at risk of falling and vehicle strikes. The yellow high-visibility vest ensures immediate visibility of the operator, while the internal harness provides the dorsal and frontal anchor points necessary for safe structural restraint at height. Equipped with leg straps with a quick-release system and available in various sizes calibrated for height and body circumference, the equipment ensures smooth donning, maximizing comfort and drastically reducing equipment setup times on site.

Technical features

- **Type:** Fall arrest harness integrated into high-visibility vest
- **Model:** h1053_03
- **Visibility:** High-visibility yellow vest
- **Attachment points:** Rear eyelet and frontal attachment (for attention / positioning)
- **Central restraint system:** Safety belt
- **Lower restraint system:** Leg straps
- **Closure system:** Leg adjustment and closure via quick-release buckles
- **Size S Dimensions (Clothing 42–50):** Height 1200–1650 mm, Waist circumference 600–1100 mm, Thigh circumference 300–600 mm
- **Size M/L Dimensions (Clothing 48–56):** Height 1500–1900 mm, Waist circumference 750–1200 mm, Thigh circumference 500–750 mm
- **Size L/XL Dimensions (Clothing 54–62):** Height 1800–2100 mm, Waist circumference 1100–1500 mm, Thigh circumference 700–900 mm
