

Safety tiles for sports centers h620_05

Shock-absorbent flooring for sports facilities. Dimensions: 50 x 50 cm. Available in various thicknesses.

Safety flooring ideal for creating surfaces for gyms and sports centers. Thanks to the possibility of choosing between different thicknesses, these tiles are perfect for **creating weightlifting platforms and absorbing the impact of weights** used by athletes. **Easy to install** via direct laying and/or gluing. **Non-slip, permeable and draining**, capable of absorbing not only shocks, but also vibrations and sounds, **mitigating possible falls and thus avoiding trauma or micro-fractures**.

Technical features:

- Dimensions: 50 x 50 cm
- Material: rubber granules and powder recycled from end-of-life tires
- Fixing: direct laying and/or gluing
- Minimum purchasable quantity 8 pcs (2 sqm)
- Available in various thicknesses
- Available in different colors

INFORMATION

- **Width** 50 cm
- **length** 50 cm
