

Sandbox for play areas h351_20

PE-HD polyethylene sandbox for playgrounds, 161x157x53 cm, children 0-12 years, compliant with EN1176-1-2017.

The sandbox is a fundamental element in public play areas, designed to offer children a dedicated space for free play and sensory discovery. Made of **mass-colored PE-HD polyethylene**, it combines durability and structural safety, guaranteeing prolonged comfort of use in outdoor environments. The product meets the most stringent regulatory standards for the safety of playground equipment in public parks, ensuring protection and peace of mind for both users and facility managers.

Technical features
