

Sandbox for playground h350_153

Nordic pine wood playground sandbox, pressure-treated, EN 1176 certified, with 2 sliding panels in galvanized steel and HPL laminate. Playing space 200x200 cm, dimensions 400x200x40 cm.

The sandbox is a recreational equipment designed for public parks and dedicated play areas. It allows children to engage in creative and motor play activities safely, meeting the regulatory requirements for public facilities and ensuring durability over time.

The main structure is made of **autoclave pressure-treated Nordic pine wood with non-toxic salts**, ensuring resistance to weathering and protection against biological attacks. The frame consists of overlapping boards (section 16x3.5 cm) reinforced at the ends with glulam beams (section 9x9 cm). The central play space measures **200x200 cm** and can be filled with sand.

Two **upper sliding tops** allow the opening and closing of the sandbox. These tops feature a **hot-dip galvanized steel frame** for corrosion protection and panels in **vibrantly colored HPL high-pressure laminate**. The tops are equipped with a **finger anti-crush system** for accident prevention. Assembly is carried out with **8.8 galvanized steel bolts** and self-locking nuts, completed by **colored nylon nut covers** in accordance with safety standards.

Technical specifications

- Structure material: autoclave pressure-treated Nordic pine wood
- Main frame: boards section 16x3.5 cm, reinforcement beams section 9x9 cm
- Play space: 200x200 cm
- N° 2 sliding closure panels in HPL high-pressure laminate
- Panel frame: hot-dip galvanized steel
- Safety system: finger anti-crush
- Assembly: 8.8 galvanized steel bolts, self-locking nuts, nylon nut covers
- Overall dimensions: length 400 cm x depth 200 cm x height 40 cm
- Minimum space required: 700 cm x 500 cm
- Certification: compliance with European Standards EN 1176 (TÜV – SÜD)
