

## Sandbox for playground h749\_01

Sandbox module for playgrounds, polyethylene and aluminum, 150x150x30 cm, 8 children, with cover sheet.

The sandbox is a play structure designed for play areas in beach resorts and public parks, where children can model wet sand, developing creativity and motor skills. Made of **polyethylene on aluminum uprights**, it combines construction lightness with structural solidity. The presence of the **cover sheet** facilitates hygienic maintenance and protection from atmospheric agents.

## Technical characteristics

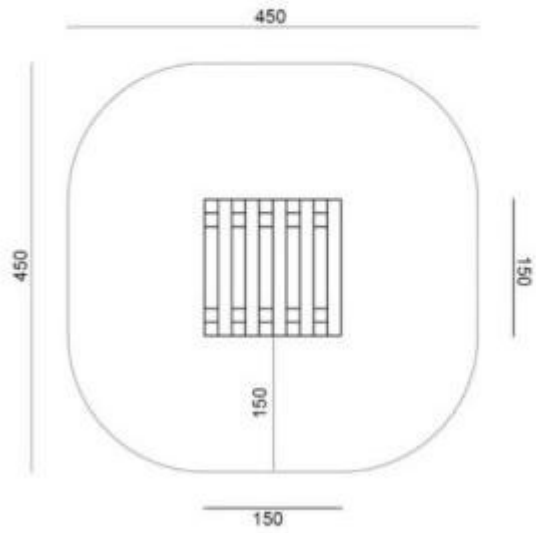

- Dimensions: L. 150 x D. 150 x h. 30 cm
- Material: polyethylene and aluminum
- Made from recycled material
- Capacity: 8 children simultaneously
- Recommended age: 1+ years
- Free Fall Height (FFH):

## INFORMATION

- Length in millimeters 150.000000
- Depth in millimeters 150.000000
- Height in millimeters 30.000000
