

## Sandbox for preschools h364\_18

Plastic sandbox with umbrella and track-lid for children. Dimensions 118x66x53 cm, complete with educational accessories and drain plug.

Modular sandbox designed for public play and school environments. Made of **durable plastic**, it offers a protected space where children can explore, dig and build, developing fine motor skills and socialization skills through free and creative play.

The structure is supported by **4 stable feet** and includes a **removable umbrella** to ensure protection from sunlight during activities. The **elasticated lid** acts as a multi-functional element: it protects the sand from external pollution and, thanks to the raised molded tracks, allows it to be used as a track for marbles and toy cars, extending play possibilities.

The complete kit of accessories (boats, shovel, pots) supports various modes of sensory exploration, encouraging children to discover physical properties of sand and develop collaborative behaviors.

## Technical features

- Dimensions: **W. 118 x D. 66 x h. 53 cm**
- Frame material: **plastic**
- Lid: elasticated with molded tracks for marbles and toy cars
- Support: 4 feet for stability
