

Sanitary pad and tampon dispenser h224_15

Professional stainless steel dispenser for pads and tampons. Dimensions 23x10x25 cm. Sliding mechanism for single and hygienic retrieval.

The **H224_15 dispenser** represents a professional solution for the distribution of menstrual pads and tampons within collective toilet facilities. Designed to combine **functionality and hygiene**, the device is made of **stainless steel**, a material that guarantees mechanical resistance and ease of sanitization. The dispensing system is based on an **internal sliding mechanism** that allows the extraction of a single unit at a time, maintaining order and reducing waste.

Operation is facilitated by **side windows** that allow maintenance staff to monitor the level of remaining materials without having to open the compartment. The security of the content is ensured by a **front lock**, which prevents tampering or unauthorized removal of the internal stock.
