

Sanitary pad dispenser h20_218

Professional galvanized steel dispenser for sanitary pads and tampons. Three compartments, key lock, and wall mounting for high-traffic restrooms.

The **sanitary pad dispenser H20_218** is a technical solution designed to optimize hygiene and organization in the restrooms of public and commercial facilities. Thanks to its configuration with **3 separate compartments**, it allows for the orderly distribution of folded external sanitary pads and internal digital tampons with a length of up to 12.5 cm. The structure is entirely made of **galvanized steel** with a polyester powder finish, a material choice that ensures high resistance to corrosion, fundamental in environments characterized by high humidity levels.

The integrity of the consumable material is protected by a **top lock with a key**, which prevents improper withdrawal or tampering. The Made in Italy design, combined with the white RAL 9003 finish, gives the device a professional and discreet profile, capable of integrating into heterogeneous architectural contexts without altering their aesthetics.

Technical specifications

- **Material:** high-resistance galvanized steel
- **Finish:** white RAL 9003 polyester powder coating
- **Configuration:** 3 compartments for external pads and tampons (max 12.5 cm)
- **Security:** top lock with security key
- **Installation:** wall mounting with included assembly kit (screws and wall plugs)
- **Weight:** 5.2 kg
- **Dimensions:** 13.5 x 37.5 x 41.5 cm (W x D x H)
- **Origin:** Made in Italy product
