

Satin finish restaurant waste bin h20_200

Professional 70L bin in satin-finished AISI 430 stainless steel with pedal and wheels. Structure with removable front for advanced hygiene in HoReCa.

This **professional waste bin** is designed to meet the rigorous hygiene standards required in high-traffic contexts and industrial kitchens. Made of **AISI 430 stainless steel with a satin finish**, the structure combines mechanical resistance and ease of sanitation, making it ideal for restaurants, fast food outlets, stations, and airports. The integration of a **wide pedal** allows for waste disposal without manual contact, ensuring maximum biological safety for the operator.

The design focuses on ergonomics and operational efficiency: the **removable front** allows for quick and effortless bag replacement, avoiding vertical lifting of the load. Bag stability is ensured by a dedicated bag-holder elastic, while maneuverability is provided by two silent rubber wheels and a rear steel handle, facilitating floor cleaning operations and container movement.

Technical features

- Material: high-quality AISI 430 stainless steel
- Capacity: 70 Liters
- Dimensions: W 480 x D 420 x H 755 mm
- Weight: 10.2 kg
- Finish: anti-reflective satin
- Operation: reinforced mechanical pedal HACCP compliant
- Fixing system: perimeter bag-holder elastic
- Accessibility: removable front panel for easy extraction
- Mobility: 2 non-marking rubber wheels and push handle
