

Satin stainless steel pedal bin h185_53

Professional bin in satin AISI 304 stainless steel with pedal opening, soft-close, and 11.5 kg anti-tip structure.

The **h185_53** bin is an advanced technical solution designed for waste management in professional contexts where hygiene, durability, and aesthetics are primary requirements. Made entirely of **AISI 304 stainless steel** (UNI X5 CrNi 1810), it offers resistance to corrosion and mechanical wear significantly superior to commercial standards, making it ideal for high-traffic environments such as hotels, restaurants, and public offices.

The device integrates a robust and precise **pedal opening** mechanism, essential for preventing cross-contamination by eliminating hand contact with surfaces. The **soft-close** lid ensures optimal acoustic comfort in indoor environments and limits the dispersion of odors. Maintenance is simplified by the **internal bag holder**, which ensures stable positioning of consumables without compromising the formal cleanliness of the external design.

Technical features

- **Dimensions:** W 350 x D 336 x H 700 mm
- **Material:** High-thickness AISI 304 stainless steel
- **Finish:** Anti-reflective satin steel
- **Weight:** 11.50 kg (high stability)
- **Mechanism:** Reinforced pedal with soft-close system
- **Bag management:** Internal bag holder for quick fixing
- **Safety:** Certified anti-tip structure
- **Operation:** Emptying via vertical lifting of the bag

Image purely indicative

INFORMATION

- **Capacity** 70 lt
- **Strengths** con apertura a pedale, in acciaio inox, portasacco
