

School chair seat height 30 cm h872_39

Ergonomic school chair H872_39 in polypropylene and metal. Seat height 46 cm, with Ø65 mm wheels, ideal for students over 12 years old.

The **H872_39 school chair** is a solution designed to integrate ergonomics, mobility, and resistance within modern educational environments. Specifically designed for children in the **+12 age group**, this seat promotes the maintenance of a correct posture during lesson hours thanks to the **curved backrest** and the ergonomic shaping of the shell. The mobile structure allows for quick and silent reconfiguration of the classroom, supporting collaborative teaching dynamics.
