

School desk h908_59

Single-seater school desk 70x50 cm in steel with metal grid undershelf. Robust Ø28 mm structure for an organized and safe teaching environment.

The **h908_59 single-seater school desk** represents a technical furniture solution designed for the needs of modern educational environments. The supporting structure in **28 mm steel tubing** has been developed to ensure superior stability and prolonged mechanical resistance, even in intensive use contexts. The integration of a **wire mesh undershelf** allows for optimizing individual space management, allowing the student to store books and backpacks neatly without cluttering the work surface.

Technical specifications

- **Frame:** Ø28 mm curved steel tube structure with scratch-resistant painted finish.
- **Worktop:** 70 x 50 cm surface with rounded corners for injury prevention.
- **Storage system:** Integrated metal grid undershelf for teaching materials.
- **Fixed height:** 76 cm, compliant with ergonomic standards for school posture.
- **Safety:** Rounded edges and leg terminals with non-slip feet.
