

## School desk with twin-column structure h908\_82

Single-seater twin-column school desk H908\_82 in steel and beech, 70x50x64 cm. Reinforced structure and integrated under-shelf for intensive school use.

The **single-seater twin-column school desk model H908\_82** is a study station designed to meet the typical demands of high-frequency educational environments. Characterized by a **steel load-bearing structure** with 28 mm diameter legs, the module guarantees superior stability compared to single-column models, eliminating oscillations during writing. The integration of the **beech under-shelf** solves the problem of organizing school materials, allowing students to keep the work surface free of clutter and promoting concentration.

## Technical features

- **Type:** Single-seater twin-column desk for professional school use
- **Structure:** Aluminum-painted steel with cylindrical legs Ø28 mm
- **Dimensions:** W 70 x D 50 x H 64 cm
- **Worktop:** Anti-reflective ivory finish and easy maintenance
- **Storage compartment:** High-resistance natural beech under-shelf
- **Intended use:** Primary and secondary schools
- **Stability:** Twin-column design for uniform load distribution
