

School desk with twin-column structure h908_85

Single-seater h908_85 desk in steel and beech, 70x50x82 cm. Twin-column structure with integrated undershelf for superior educational organization.

The **single-seater desk h908_85** is a technical furnishing solution developed to meet the needs for stability and resistance in high-traffic school environments. Designed with a 28 mm **twin-column steel structure**, the desk minimizes lateral oscillations, offering a firm and safe work surface. The integration of a **beech wood undershelf** allows the upper surface to be cleared of books and stationery, promoting a more orderly and functional space management for the student.

Technical features

- **Dimensions:** W 70 x D 50 x H 82 cm (fixed height)
- **Frame:** Tubular steel diameter 28 mm, aluminum-colored painting
- **Configuration:** High-stability twin-column single-seater
- **Worktop:** Anti-reflective ivory finish
- **Storage compartment:** Structural beech wood undershelf
- **Components:** Scratch-resistant and noise-reducing tips at the ends of the structure
