

Scoop stretcher h655_03

First aid scoop stretcher. Dimensions: L165 x W45 x H6.5 cm.

Scoop stretcher for the injured, ideal for delicate and safe transport of seriously injured patients. Specifically designed for rescuing people with spinal injuries, as it can be opened to slide the two side parts directly under the patient, without having to lift or move them. It can also be used for magnetic resonance imaging, as it is **X-ray permeable**. The structure features an **aluminum frame** and a **synthetic material** surface. Safety belt included in the supply.

Technical features:

- Dimensions: L165 x W45 x H6.5 cm
- Material: synthetic material and aluminum
- X-ray compatible
- Supplied complete with safety belt
- Color: yellow
