

Scooter rack h729_33

Wall-mounted scooter holder with a capacity of 9 scooters. Dimensions: W 119 x D 27 x h 15 cm. Anthracite grey anti-corrosion painting.

The **scooter rack H729_33** is a versatile and resistant solution for parking and securing scooters. Ideal for public spaces like schools, shopping centers, company parking lots, or urban areas, this wall-mounted scooter rack is designed to accommodate up to **9 scooters simultaneously**, optimizing available space and improving organization.

Thanks to its **intelligent and functional design**, each scooter is supported by a **"V"-shaped hook** that ensures stable locking, while the serpentine structure allows the use of cable or U-locks (not included), offering optimal security. The robust fixing plate, with pre-drilled holes of Ø11 mm, makes installation quick and easy on any solid vertical surface.

Made with high-quality materials, the rack is equipped with **multi-layer painting**: an anti-corrosion treatment to resist atmospheric agents and an anthracite grey epoxy powder paint, which guarantees a long life and a modern aesthetic. With its compact and linear design, it integrates perfectly into public or private contexts, adding order and professionalism to spaces.

Optimize your spaces and offer a safe and durable solution for scooter parking with the **H729_33** rack. Perfect for every type of environment, it combines functionality and design to meet the needs of those looking for a reliable and professional solution.

Buy it now and guarantee your users a modern and tidy parking area. For large-scale projects, **contact us for a tailor-made quote** and discover the offers dedicated to multiple orders!

- **Durability:** Materials treated to resist rust and atmospheric agents.
- **Ease of installation:** Simple and stable wall fixing via pre-drilled brackets.
- **Modern aesthetics:** Elegant and functional design, ideal for public and private contexts.

FAQ:

1. How many scooters can the rack accommodate?

The H729_33 rack can accommodate up to 9 scooters simultaneously.

2. How is the rack installed?

Fixing is done via two brackets with pre-drilled plates (15 x 15 cm). Plugs and screws suitable for the type of wall are required (not included).

3. Is it weather resistant?

Yes, thanks to the anti-corrosion treatment and epoxy paint, the rack is designed to resist rain, humidity, and sun.

4. What types of locks can I use?

The design supports the use of cable or U-locks (not included), thanks to the serpentine structure with Ø 22 mm holes for secure fixing.

Short buying guide:

Choosing a scooter rack requires attention to specific details. First of all, evaluate the **capacity**: if you manage an area with high scooter traffic, opt for models with a large capacity like the **H729_33**, which accommodates up to **9 scooters**.

Another important factor is **weather resistance**, essential for outdoor use. Ensure that the product is treated against rust and made with robust materials. The **multi-layer painting** of the H729_33 guarantees durability over time without compromising aesthetics.

Consider also **security**: models like this, compatible with cable or U-locks, offer additional protection against theft. Finally, check that the **fixing system** is stable and easy to install, especially if you need a quick and practical solution.
