

Scrap container for forklift h286_53

800L steel tipping skip for forklifts, 1350kg capacity. Watertight tank and 160° rotation for the safe discharge of industrial waste. The **scrap container for forklift h286_54** is a professional solution designed for the efficient management, recovery, and transport of industrial waste in workshops, construction sites, and production facilities. Characterized by an extremely solid structure in **reinforced steel tubes and sheets**, this skip is designed to withstand intensive work cycles and prolonged mechanical stress.

Operational integrity is guaranteed by the **welded watertight tank**, a fundamental technical specification that prevents the leakage of liquids, oils, or emulsions during handling. To optimize the product's service life and safety, the system integrates **two locking hooks** and **rubber shock absorbers** dedicated to absorbing shocks and vibrations during discharge phases.

Technical specifications

- **Material:** Reinforced steel with high-thickness tubes and sheets
- **Volumetric capacity:** 800 liters
- **Maximum capacity:** 1350 kg
- **Rotation system:** 160° via fork pockets with terminal joint
- **Handling:** 2 fixed wheels and 2 swivel wheels in Vulkolan mounted on ball bearings
- **Safety:** Mechanical locking hooks and rubber shock absorbers
- **Seal:** Welded watertight tank for liquid containment
- **Surface protection:** RAL 5015 blue industrial painting
- **Overall dimensions:** W 111 x D 140 x H 127.5 cm (H 107.5 + 20 cm wheels)
