

Screen for medical clinics h448_26

Two-section hospital screen, epoxy steel frame, removable washable fabrics, folding with wheels, for medical offices and clinics.

Folding screen specialized for the **separation of patients** in healthcare environments. Designed for medical offices, clinics, and hospitals, it allows for the creation of dedicated areas while maintaining management flexibility and high hygiene standards.

The **steel structure with epoxy coating** guarantees resistance and ease of cleaning. The **removable and washable fabrics** allow for complete and frequent sanitization, a critical aspect in medical contexts. The **folding** system facilitates storage and transport, while the **45 mm swivel wheels** allow for quick and precise positioning.

Technical characteristics

- Structure: steel frame with epoxy coating
- Removable and washable fabrics
- Configuration: 2 sections
- Movement system: Ø 45 mm swivel wheels
- Dimensions: W. 75x2 x D. 40 x H. 177 cm
- Weight: approximately 8 kg
- Folding functionality for transport and storage
