

Secondary school chair height 46 cm h553_07

Secondary school chair in beech wood. Height 46 cm. Size 6.

Secondary school chair, in **beech wood** for elementary schools. School chair **produced** with high-quality materials, resistant and durable over time. **Tubular structure Ø 25** continuous wire welded, support and reinforcement connections of the structure fitted beneath the seat. **The chair** is made according to current regulations. In relation to the student's height, the regulations aim to encourage the adoption of a **correct posture**, contributing to the psychophysical development of children and young people. The fixing of one component to another occurs via continuous wire welding which guarantees maximum hold and the absence of imperfections, thus leaving the structure free of defects that could cause damage to people or things. **Painting** is carried out by applying epoxy powders, after degreasing and phosphating treatment, and subsequent polymerization in a thermal tunnel at 200°. The seat and the backrest are made of 7 mm beech plywood, hot-pressed, curved and shaped with an ergonomic form to ensure maximum comfort, naturally painted by applying non-toxic water-based paints. The seat and backrest are fixed to the metal structure using eight high-strength rivets, four for the back and four for the seat. The chair is equipped with non-removable, noise-reducing and non-slip rubber feet which, even if dragged, do not leave any trace on the floor.

Technical characteristics:

- Beech wood material
- Seat and backrest in 7 mm curved beech
- Tubular structure Ø 25
- Continuous wire welded
- Stackable
- Height: 46 cm
- Size 6
