

Secondary school chair size 6 h979_45

Ergonomic chair for secondary school h979_45, size 6. Equipped with a monoblock multicolour polypropylene shell, powder-coated steel frame, and non-slip feet. Seat height 460 mm, stackable.

The **secondary school chair size 6 h979_45** is a high-resistance professional school seat, developed specifically for **school managers, educational institution employers, school interior designers, teachers, and safety officers in the educational field**. This complement responds to the organizational need to set up classrooms with ergonomic furniture compliant with the statures of taller students, solving the operational problem of **maintaining a correct and comfortable posture during lesson hours, ensuring maximum stability and facilitating tidying and cleaning operations thanks to a stackable and lightweight structure to move**. The chair is equipped with a monoblock polypropylene shell with a colour-coordinated finish and seat, and features a top handle for transport, rounded anti-trauma edges, and a non-slip surface texture. The supporting base is made of robust steel tubing treated with special anti-corrosive baths and epoxy painting, completed by protective feet at the base. Supplied already fully factory-assembled for immediate use, the chair supports four-leg or cantilever configurations and is stackable up to 8 units.

Technical features

- **Product type:** secondary school chair size 6
- **Code reference:** h979_45
- **Overall width:** 49 cm (490 mm)
- **Overall depth:** 49 cm (490 mm)
- **Total overall height:** 81 cm (810 mm)
- **Specific seat height (Size / Measure):** 460 mm (size 6)
- **Seat material (Shell):** molded monoblock polypropylene
- **Ergonomic properties of the shell:** anatomical design, flexible rear reinforcement and rounded perimeter edges
- **Shell surface finish:** high-grip non-slip texture
- **Integrated shell accessories:** shaped top handle to facilitate transport
- **Support structure material and specifications (4 legs):** steel tube with Ø 20 mm diameter and 1.5 mm thickness
- **Structure material and specifications in the cantilever version:** steel tube with Ø 20 mm diameter and 2 mm thickness
- **Joining mechanics:** stable fixing of the metal structure to the shell via 4 screws
- **Protection devices at the base:** non-slip plastic feet installed on all legs
- **Metal surface treatment (Finish):** epoxy-polyester electrostatic powder coating (epoxy coating)
- **Corrosive chemical cycle of the structure:** industrial degreasing treatment and application of nanoceramics with anti-corrosive microcrystalline bath and passivation process (increased penetration capacity and 300% improvement in paint resistance and adhesion)
- **Available colour finishes:** shell and seat configured in the same colour; single colour available in various variants
- **Complementary use properties:** stackable chair up to a maximum of 8 units
- **Delivery configuration:** supplied already assembled and ready for use

- **Management and corporate quality certifications:**

- Initial inspection of our production and control system
- Initial product type test
- Surveillance, supervision, and assessment of the quality system
- Tests on raw materials from our suppliers
- ISO 9001, 14001 and 14006 certifications for corporate management
