

## Secondary school desk with undershelf h908\_65

Single-seat school desk in Ø28 steel, 70x50 cm top, 59 cm height. Equipped with a metal grid underneath and footrest for ergonomics and order.

The **h908\_65 single-seat school desk** is a professional furnishing solution designed for setting up classrooms in primary and secondary schools. The structure is designed to respond to the mechanical stresses typical of the school environment, while ensuring correct posture and efficient organization of the individual workspace.

The integration of a **metal grid undershelf** allows for the housing of books and stationery without reducing the operating surface of the upper top. The base, characterized by a circular section steel tube structure, offers superior stability thanks to the curvature of the legs, which optimizes load distribution and prevents the risk of accidental tipping.

## Technical specifications

- **Total dimensions:** W 70 x D 50 x H 59 cm
- **Supporting structure:** Ø28 mm continuous curvature steel tube
- **Work surface:** 70 x 50 cm high-resistance material top
- **Storage compartment:** Electrowelded metal wire grid
- **Ergonomic elements:** Footrest integrated into the structure
- **Stability:** Anti-scratch and anti-noise terminal feet
