

Self-extinguishing indoor recycling bin 65 lt h424_125

Self-extinguishing recycling bin 65 lt, galvanized steel, front door. With internal metal container. W. 295 x D. 295 x h. 863 mm.

The **h424_125 self-extinguishing indoor recycling bin** is designed to guarantee safety, functionality and modern design, ideal for indoor spaces. Made of **galvanized steel**, with a finish using thermosetting polyester resin powder coating, it resists over time without compromising its aesthetics.

This **modular model** features an **internal metal container** and a **front door with magnetic closure**, which facilitates emptying and maintenance. The **integrated base** and adjustable feet allow for stable positioning and adaptability to any environment.

Perfect for offices, schools, hospitals and other facilities, the container features a **self-extinguishing** structure making it safe for use in indoor environments, minimizing risks in case of contact with hot or flammable materials.

Upon request for a quote, it is possible to ask for a colored sticker with the name of the waste (not included in the supply).

Choose the **h424_125 self-extinguishing bin** for a safe and organized waste management in indoor spaces. **Contact us for a personalized quote!**

Technical features:

- **Dimensions:** W. 295 x D. 295 x h. 863 mm
- **Capacity:** 65 lt
- **Self-extinguishing**
- **Material:** galvanized steel with thermosetting polyester resin powder coating
- **Collection system:** internal metal container
- **Front door:** with magnetic closure
- **Base:** integrated with adjustable feet
- **Anchoring:** ground standing
- **Stickers:** not included in the supply, can be purchased separately on request
- **Suitable for:** indoor environments

User benefits:

- **Self-extinguishing safety:** The structure prevents the spread of fires, ensuring peace of mind in any context.
- **Customizable modularity:** Perfect for creating bespoke recycling solutions.

- **Ease of emptying:** The front door with magnetic closure simplifies daily maintenance.
- **Stable positioning:** Thanks to the adjustable feet, it adapts to different surfaces without problems.
- **Guaranteed durability:** Galvanized steel and powder coating make it resistant to scratches, bumps and chemical agents.

FAQ:

1. **Is it suitable for outdoor environments?**

The model is suitable for use in indoor and outdoor environments in normal weather conditions.

2. **What does “self-extinguishing” mean?**

The structure is designed to extinguish any flames inside it, reducing risks associated with flammable materials.

3. **What are the emptying methods?**

Emptying takes place through a front door equipped with a practical magnetic closure.

4. **Are the waste stickers included?**

No, the stickers are not included in the supply, but can be purchased separately and upon request for a quote.

5. **Is the container stable on uneven surfaces?**

Yes, thanks to the adjustable feet, it can be easily adapted even on surfaces that are not perfectly level.

Short buying guide:

Choosing a **self-extinguishing bin** for indoor recycling is an ideal solution to combine safety, hygiene and organization in closed environments. The **h424_125** model fits perfectly into spaces such as offices, schools, hospitals and common areas thanks to its compact and modular design. Before buying, carefully consider the dimensions of the bin and its **65 liter** capacity, ideal for managing medium volumes of waste. The galvanized steel structure guarantees durability and resistance, while the self-extinguishing system offers an additional level of safety against the risk of fires. This model is designed to facilitate emptying operations thanks to the **front door with magnetic closure** and the removable internal container.

Self-extinguishing indoor bin, galvanized steel recycling bin, modular waste container, 65 liter bin with magnetic closure, customizable recycling bin, indoor bin with adjustable feet, safe bin for offices, self-extinguishing bin for indoor environments, safe and durable recycling bin, fire-retardant waste collection bin.
