

Self-tipping hopper 1,100 l h1004_12

1,100 L self-tipping hopper in 2.5 mm sheet metal for bulk materials. Capacity 2,000 kg, watertight structure and integrated handling.

The **1,100-liter self-tipping hopper** is professional equipment designed to optimize the storage, transport, and discharge of bulk materials, waste, and industrial scraps. Made with robust **2.5 mm sheet metal**, this skip ensures high structural strength and superior longevity even in heavy-duty operational contexts such as workshops, construction sites, and production plants.

The **automatic tipping system** allows for quick and controlled emptying, eliminating the need for heavy manual intervention and significantly increasing operator safety. The structure is engineered with an integral **watertight seal**, a fundamental feature that allows its use with wet materials or those containing liquid residues, preventing contamination of the work area.

Technical features

- **Capacity:** 1,100 liters
- **External dimensions:** W.1860 x D.1250 x h.1045 mm
- **Tank dimensions:** W.1750 x D.1160 x h.890 mm
- **Empty weight:** 198 kg
- **Maximum load:** 2,000 kg
- **Material:** 2.5 mm thick steel sheet
- **Standard color:** blue
- **Handling:** set up for pick-up with pallet truck and forklift
- **Structure:** watertight for liquids and solids
- **Certifications:** provided with CE marking

Optional accessories:

- Protection cover
- Wheel kit for manual handling
- Hydraulic cylinder for assisted and even smoother tipping
- Customized versions and colors on request
