

Self-tipping hopper 320 Lt h1004_13

320-liter steel self-tipping hopper, watertight structure and 800 kg capacity. Ideal for rapid discharge of bulk and wet materials. The **320-liter self-tipping hopper** represents a professional solution for the optimization of storage, transport, and controlled discharge processes of bulk materials. Designed to withstand intensive work cycles, the structure is made of **RAL 5010 painted steel** with a sheet thickness of **2 mm**, ensuring high mechanical resistance and protection against wear.

Operation is facilitated by a **front button on the frame** that allows for rapid tipping, minimizing physical effort and increasing productivity. Thanks to the **watertight structure**, the container is suitable not only for collecting solid waste, but also for managing wet materials or residues containing liquids, ensuring the cleanliness of the work environment.

Technical specifications

- **Capacity:** 320 liters
- **External dimensions:** L.1235 x D.840 x H.750 mm
- **Empty weight:** 85 kg
- **Maximum load (capacity):** 800 kg
- **Material:** 2 mm thick steel sheet
- **Finish:** RAL 5010 painting (blue)
- **Handling:** Designed for pallet trucks and forklifts
- **Discharge system:** Tipping via front button
- **Safety:** Anti-slip protection chain included
- **Seal:** Watertight structure for solid and liquid materials
- **Certifications:** CE mark
