

Self-tipping skip 1500 lt h1004_11

Industrial self-tipping skip in 2.5 mm sheet metal, 1,500 liter capacity and watertight. Ideal for safe unloading via forklift.

The **1,500 liter self-tipping skip** represents a professional solution for the optimization of logistic flows related to the storage and disposal of bulk materials. Designed for intensive industrial contexts, the structure is made of **2.5 mm thick steel sheet**, ensuring superior structural strength and a long operating life even under heavy loads. The automatic unloading system eliminates the need for risky manual interventions, allowing the operator to manage emptying directly from the forklift driving position.

The peculiarity of this hopper lies in its **watertight structure**, which makes it suitable not only for handling solid waste, but also for containing industrial residues containing liquids, avoiding harmful dispersions in the work environment. The base is configured for quick pick-up via **pallet truck or forklift**, ensuring maximum versatility in warehouses and production departments.

Technical features

- **Capacity:** 1,500 liters
- **Maximum load:** 2,500 kg
- **Material:** 2.5 mm thick sheet metal
- **External dimensions:** L.1860 x D.1600 x H.1045 mm
- **Tank dimensions:** L.1750 x D.1500 x H.890 mm
- **Unladen weight:** 200 kg
- **Certification:** CE Mark
- **Handling:** Designed for pallet truck and forklift
- **Safety:** Automatic tipping system and watertight structure
- **Standard color:** Blue

Available options:

- Upper protective lid
- Wheel kit for manual handling
- Hydraulic cylinder for decelerated tipping control
- Customized productions on specific request
