

Semicircular table thickness 25 mm h848_30

Semicircular table h848_30 (160x80x53h cm) in melamine 25 mm thick and tubular Ø 40 mm. Joinable, for early childhood school classrooms.

The **Semicircular table thickness 25 mm h848_30** is school furniture designed for setting up classrooms and educational environments dedicated to early childhood. This table solves the operational need to create flexible and safe work configurations, allowing both single use and the joining of multiple modules to set up classrooms. The structure reduces the risk of accidental impact thanks to the design of the semicircular top with rounded edges. Aimed at nursery schools, kindergartens, playrooms, and educational centers, the furniture consists of a melamine top with a thickness of 25 mm and a tubular structure with a diameter of 40 mm. The table has dimensions of 160 x 80 cm with a height from the ground of 53 cm and a net weight of 30.50 kg. The structure is supplied in Light Gray and Metallic color variants, while the top is made in an Ivory finish, with the possibility of requesting the top in a different color on request.
