

Sepiolite powder bucket h1043_51

Mineral powder absorbent based on sepiolite for universal liquids, in a 20 kg bucket (absorbent capacity 16 liters). Inert, non-toxic, fireproof product and fine 15/30 grain size.

The **sepiolite powder bucket** (model h1043_51) is a mineral and porous powder absorbent for universal liquids, designed specifically for the timely remediation and securing of industrial floors in the event of accidental spills. Developed for **factories, workshops and work areas in general**, this equipment is aimed at safety managers (RSPP) and environmental managers who must maintain premises suitable and compliant with current protection regulations. The product solves the operational problem of **spilled liquids (such as oil, gasoline, water, etc.) that can cause slip accidents, fermentation phenomena, chemical-environmental risks and undesirable odors**, capturing the pollutant inside its microscopic structure. Thanks to its mineral origin, the powder is completely inert, non-toxic, non-degradable and possesses excellent fireproof and non-combustible properties, ensuring safe use in any emergency scenario both inside and outside the facility.

Technical characteristics

- **Model and type:** powder absorbent for universal liquids
- **Composition and origin:** porous mineral granules (sepiolite), inert and non-toxic product of natural origin
- **Physical consistency:** powder
- **Nominal absorbent capacity per single container:** 16 liters (LT. 16)
- **Packaging and supply format:** 20 kg bucket (20 KG BUCKET)
- **Grain size parameters:** 15/30 grain size
- **Spectrum of action and compatibility:** universal, suitable for the absorption of all types of liquids (including oil, gasoline, water)
- **Chemical-physical stability and fire behavior:** non-flammable, non-explosive, non-combustible, non-degradable, fireproof
- **Regulatory compliance and European directives:** substance not considered dangerous compliant with directive 1999/45/EC and European directives 91/155/EEC, 93/112/EC and 2001/58/EC
