

Sepiolite powder for universal liquids h1043_50

100% natural sepiolite-based mineral powder absorber for universal liquids, in a 20 kg bag (absorbing power 16 liters). Fireproof, inert, non-toxic product with fine 15/30 granulometry.

The **sepiolite powder for universal liquids** (model h1043_50) is a 100% natural mineral industrial absorber, specifically developed for the remediation and restoration of floors affected by accidental spills of fluid substances. Designed for logistical integration in **factories, workshops and work areas in general**, this safety measure responds to strict hygiene and safety needs in the workplace. The formulation solves the operational problem of **leaked liquids (such as oil, gasoline, water, etc.) that can cause accidents, fermentation, hazards and unwanted odors**, leaving surfaces completely safe, clean and dry. Thanks to its mineral-based nature not chemically modified, the powder comes in fine light cream-colored granules, is completely inert, harmless to humans, agriculture and animals, and boasts fireproof and non-combustible properties that allow its universal use both indoors and outdoors.

Technical features

- **Model and type:** powder absorber for universal liquids
- **Chemical-material composition:** 100% natural mineral sepiolite (no chemicals or modifications)
- **Physical appearance:** fine light cream-colored granules
- **Reference granulometry:** parameter 15/30 (particle size between 0.6 and 1.3 mm)
- **Nominal absorbing power per single bag:** 16 liters (16 L)
- **Packaging and weight:** 20 kg bag (20 KG BAG)
- **Logistical configuration per pallet:** quantity per pallet equal to 50 bags
- **Chemical-physical moisture parameters:** maximum moisture (%) 12.0
- **Specific absorbent capacity - Water:** minimum water absorption (%) 135
- **Specific absorbent capacity - Diesel:** minimum diesel absorption (%) 85
- **Fire behavior and chemical stability:** non-flammable, non-explosive, non-combustible, non-degradable, fireproof
- **Toxicological profile:** inert and non-toxic product of natural origin, harmless to humans, agriculture and animals
- **European regulatory compliance:** substance not considered dangerous according to directive 1999/45/EC and European directives 91/155/EEC, 93/112/EC and 2001/58/EC
- **Storage instructions:** store in a dry place, protected from moisture
