

Service clearing trolley h110_170

Professional stainless steel waste trolley with double bag holder, ideal for waste logistics management in the HoReCa sector. The **h110_170** waste trolley is a technical solution designed to optimize waste management in high-intensity professional operating environments. Made entirely of **stainless steel**, this support guarantees superior structural resistance and lasting protection against oxidation resulting from contact with organic agents or humidity. The double-compartment configuration allows for housing two separate bags, facilitating waste sorting operations or the simultaneous disposal of large volumes of waste without compromising the stability of the trolley.

Technical features

- Material: high-resistance stainless steel
- Capacity: 2 slots for garbage bags
- Overall dimensions: W. 100 x D. 60 x H. 80 cm
- Operating weight: 15.3 kg
- Assembly: simplified system for quick setup
- Maneuverability: balanced structure for fast and safe movement
